THE WORLD'S MOST ADVANCED VCSEL GERMAN TECHNOLOGY

PicoSpectra P Revolutionizing Skin Treatments with Advanced VCSEL Technology

Experience the future of aesthetic treatments with the PicoSpectra P Model, a state-of-the-art pico laser machine designed to deliver unparalleled results with VCSEL (Vertical Cavity Surface Emitting Laser) technology. This cutting-edge device is engineered for precision, efficiency, and long-term performance, making it the ultimate choice for clinics and medspas seeking high ROI and zero maintenance.

TECHNICAL SPECIFICATIONS

Lifespan	> 20 million shots
Frequency	10hz/20hz
Screen Size	8.4 Inch Touchable Color LCD Sreen
Wavelength	532/1064/1320nm (black Doll)
Laser Bar Size	3-5MM
Cooling System	Wind + Water Cooling
Water Tank Capacity	2 L
Language	English, Korean
Weight	25kg
Warranty	2.5 Year

GERMAN LASER STACK FROM JENOPTIC

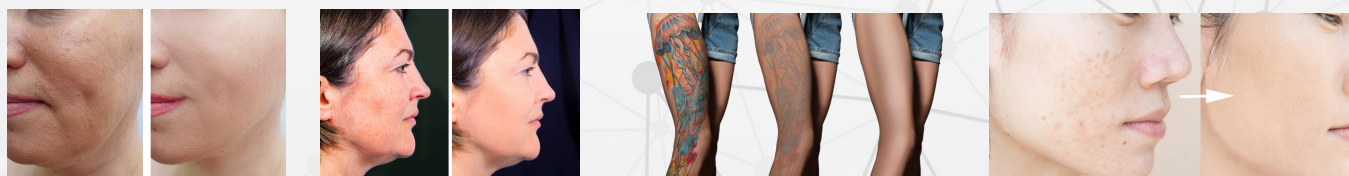

LASER STACK WITHOUT LAMP, OFFERING 10-20 MILLION SHOTS LIFESPAN

3MM, 5MM SPOT SIZE

BEFORE AND AFTER

KEY ADVANTAGES

(Featuring Jenoptik Laser Stack, Germany)

- Zero Maintenance Design – No filters or frequent part replacements required, reducing operational costs.
- Ultra-Long Lifespan – 10-20 million shots ensures years of high-performance use.
- Premium German Engineering – Jenoptik laser Stack (Germany) guarantees superior energy stability & efficiency.
- High ROI – Low upkeep costs + long-lasting components maximize profitability.
- No Downtime – Continuous operation without interruptions for maintenance.
- Versatile Wavelengths (1064nm & 532nm) – Effective for tattoo removal, pigmentation, acne scars, and skin rejuvenation.

KEY FEATURES

- Jenoptik Q-Switch Stack (Germany) – Industry-leading quality for consistent, high-energy pulses.
- 30-40 Million Shots Lifespan – Far exceeds standard Stacks (typically 5-10 million shots).
- Filter-Free Operation – Eliminates the need for costly filter replacements.
- Multi-Application Handpieces – Supports tattoo removal, melasma, freckles, sunspots, and whitening.
- Smart Cooling System – Prevents overheating, ensuring patient comfort and device longevity.
- Precision & Speed – High repetition rate (up to 10 Hz) for faster treatments.
- User-Friendly Touchscreen – Intuitive controls with preset programs for different skin conditions.
- FDA/CE Certified – Meets international safety and performance standards.

Why Choose This Q-Switch Laser?

Unmatched Durability – Jenoptik Stack + 20M shots = Lowest cost per shot in the industry.

Maintenance-Free – No hidden costs for filters or frequent servicing.

High Profitability – Attracts more clients with reliable, long-lasting performance.

Machine Features

- Laser source is Laser Stack, instead of replacing Stack, it's no maintenance
- Pumping source with Permanent lifetime
- Compact handle, easier operation
- Dual wavelength 1064nm & 532nm
- Wide application for tattoo removal, pigmentation and skin rejuvenation
